

ABELDent

Clinical and Practice Management Solutions

For The Life Of Your Practice

ABELDent supports the changing needs of your dental office.

Whether you want to start with the basics, or a full-practice paperless implementation, ABEL has the right solution for your practice.

6000+ dentists use ABELDent and, for over 1/3 of them, it is the second or third dental software they've used.

Many have told us that, if they knew then what they know now, they would have selected ABELDent the first time.

Allow us to provide you with the last dental software you will ever need.

Read on to discover ABELDent, a comprehensive and reliable solution for your practice and also a few new surprises.

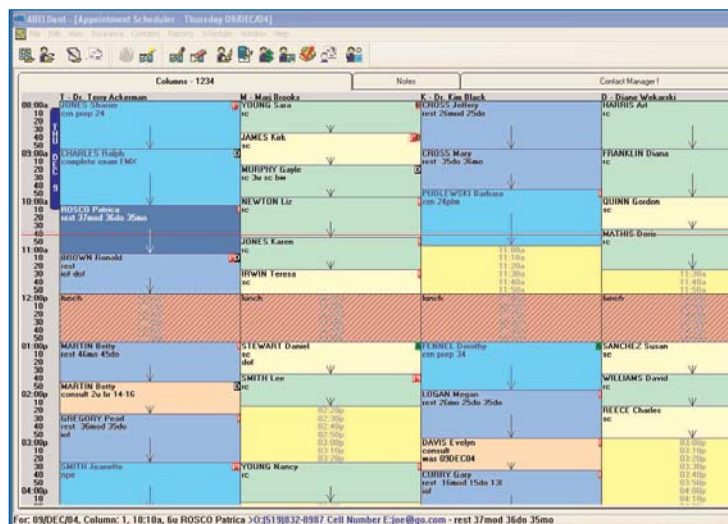

ABEL[®] Dental Software Inc.

1207 Delaware Avenue, Suite 435
Buffalo, NY 14209

Serving Dentists since 1984

ABEL Dental Software Inc. offers comprehensive, innovative software and industry-leading support and services.

Following are some key features and benefits, please visit www.abeldentalsoftware.com for more information.

ABELDent's User Interface

ABELDent's user interface keeps important information close at hand. For example, the At A Glance panel displays contact, treatment and financial information for a patient while you move through the patient's record.

Appointment Schedule

The appointment schedule is ABELDent's administrative hub - daily tasks are just a click away! ABELDent's schedule is the most flexible and powerful available. It offers a variety of display options for single and multiple users, color coding, pre-medication and appointment status flags and much more.

Contact Management

Prevent unscheduled treatment from getting lost in your charts. Track outstanding treatment and filter by provider, procedure or other criteria to focus your scheduling efforts. Track scheduling preferences, follow-up attempts and your patient's past cancelled/missed/changed appointments to help keep your schedule full and your days predictable.

Open Item Accounting

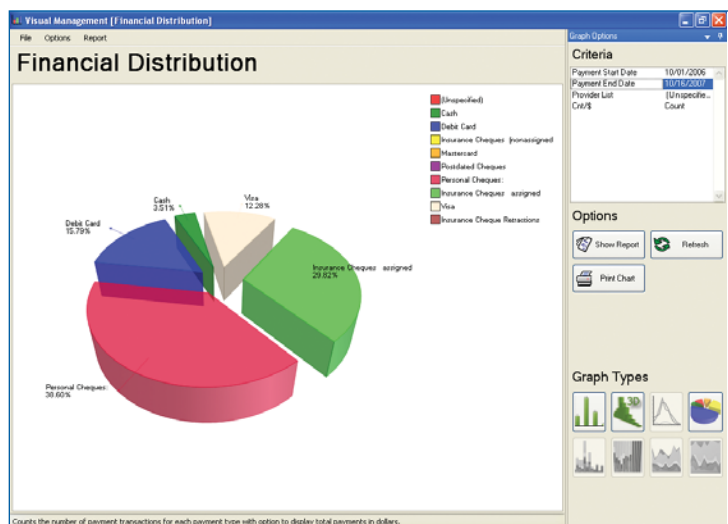

Powerful and flexible financial tracking that far surpasses the industry standard. Patients have fewer questions and pay more promptly when they can view their financial obligation on a per procedure basis.

Electronic Claims

Electronic claims solutions increase the financial efficiency of dental practices. ABEL supports the current standards and includes the current American Dental Association Dental Terminology Update for Procedures and Nomenclature.

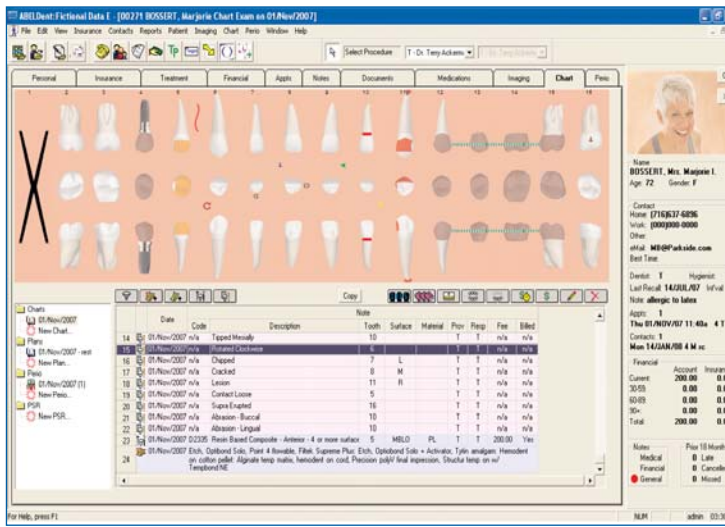

System Security

Control which users can access dozens of system features. ABELDent tracks and reports important changes in data, including changed or deleted financial records. Privacy mode hides confidential information in high traffic areas of the practice.

Reporting

It's said that you can only improve what you measure - ABELDent helps you track and measure practice productivity in dozens of areas. Monitor practice growth, demographic trends and provider capacity and productivity. Check recall retention, compare production between two time periods, ensure that you meet collections targets and so much more.

Charting and Treatment Planning

ABELDent's Chart is feature-rich and easy to use. Post conditions and planned treatment to a secure, permanent record. Create and track multi-phase, multiple option treatment plans. Maintain thorough, legible progress notes in just seconds using a library of situation-specific notes.

Periodontal Charting

Capture periodontal exam results using mouse, keyboard, or microphone. Record a simple periodontal screening or a complete periodontal examination. Display graphical and numerical values simultaneously. Compare progress over the past five exams.

Electronic Forms and Document Management

Use supplied templates for health history, new patient and other forms, or design your own templates. Store forms in a patient's record and print only as required. Use a digital signature pad to sign forms and protect them against future editing. Store documents received from external sources in a patient's record file. ABELDent supports many common file formats.

Patient Education

ABELDent includes Optio Dentistry™ patient education software at no cost. Help your patients understand your observations and treatment recommendations with dozens of 3D animations of common dental problems and procedures. Walk through animations step by step with your patient or play them as continuous videos with audio narration.

Image Management

Capture and manage images from a wide variety of sources. As an independent company, we integrate with products from many vendors so that you can choose the products that best meet your needs and budget. Once in ABELDent, images are easy to access for use in case presentations and sharing with insurance carriers and other providers.

New Releases!

ABELDent Portal

Save time and improve communication with your patients. ABELDent Portal is a secure system that allows patients to interact with your practice 24/7/365. Patients can request appointments, fill out forms, view their balance owing and view or update their demographic and insurance coverage information. Portal also sends appointment confirmation email and tracks patient response.

ABELDent Mobile Apps

Keep in touch with your practice using your smartphone or other mobile device. View your scheduled appointments, planned treatment and other patient information and contact your patients or colleagues you send referrals to. Available for the leading mobile platforms.

Now in pilot phase with wider release beginning in January.
